

**Fabricators & Designers of Marine Tanks,  
Custom Stainless Steel & Aluminum Accessories.**

**Best Fabrications, Inc. – Alternative Fuel Limited Warranty Policy for Tanks**

(Applicable to Ethanol / Gasoline Blends of more than 15% Ethanol (E15), Bio-diesel blends of more than 20% Bio-diesel (B20), or any other Alternative Fuels)

Best Fabrications, Inc. offers a one-year limited warranty against tank defects resulting from our manufacture for alternative fuel applications. *The warranty period begins at the date of original invoice.* In situations where this warranty applies, Best Fabrications will, at its option, repair or replace the defective product.

The express, written authorization of Best Fabrications, Inc. is required for all warranty claims.

Best Fabrications, Inc. does not warranty or guarantee accessories or components supplied with our tanks, since they are not of our manufacture. Sending units are covered by their own manufacturer's warranty only. Best Fabrications *cannot be held responsible* for any costs or damages incurred by the customer during removal and/or repair of any defective tank, as all tanks are sold as a single unit and warranted as such. If such damages occur, and it is determined to be a *direct* result of defective Best Fabrications, Inc. manufacture, Best Fabrications will review the facts and may negotiate these damages *on a case-by-case basis*. In any such event, Best Fabrications, Inc. must be immediately notified of any potential warranty claim, and must give written authorization before any attempt to modify, remove, or otherwise repair is made.

Any removal, repair, modification, or other tampering of any tank that may be subject to this warranty, prior to the express written notification of Best Fabrications, Inc., will cause this warranty to be void.

Although required tank pressure testing is conducted at Best Fabrications, the customer is also responsible for pressure testing tanks, as well as the entire fuel system, as required under 33 CFR 183.510. Use of an adequate, serviceable in-line fuel filter / strainer is required, or this warranty may be void.

This warranty is void if product damage or failure results from, or is attributed to, improper or faulty installation, product misuse or abuse, modifications not pre-authorized by Best Fabrications, Inc., corrosion (galvanic or otherwise), accidents, or questionable inspection, removal, and/or replacement procedures. The exclusive use of stainless steel and/or aluminum fittings is required for this warranty to be held valid. Use of any brass or copper fittings within the vessel's fuel system, or any gasket/seal materials other than Viton or Teflon shall cause this warranty to be void. System(s) for water/fuel separation must be installed and utilized in the vessel, or this warranty shall be void.

*This warranty does not apply to tanks installed in any commercial vessel, foreign or domestic military or patrol boat. These items are covered by a separate warranty policy, available upon request.*
